

"Without Sagavista, the custom coding that would have been required for every pair of linkages is unthinkable."

— Dr. Eva Swenson,
Director of Student Information,
University of Toronto

"Sagavista makes it possible for mere mortals to build really useful integration solutions. I expect Sagavista to change the way people think about Enterprise Integration."

— John Rymer,
President, Upstream Consulting

"Because of its architecture, Sagavista has an extensibility and manageability that isn't there globally with any other product we've seen."

— Howard Murphy,
Associate Vice President,
for Computer Services,
Miami-Dade Community College

"As one of the first integration solutions built on the Java™ Messaging Service (JMS), Sagavista offers extra flexibility in customer choice of messaging infrastructure."

— Mike Gilpin,
Vice President,
Giga Information Group*

"SAGA™ has the total solution. All of the interfaces are there—no one else has all of them. People who understand how difficult this is will understand the value of Sagavista."

— Tony Picardi, Senior Vice President, IDC

E-business integration is now as easy as point-and-click.

Business is moving faster than ever.

A Web presence alone is simply not enough. To be truly competitive, you need to adapt your proven systems and business processes to the Internet as quickly as possible. You need a real end-to-end e-business solution that allows you to communicate in real-time with your customers, partners and suppliers.

But as you certainly know by now, achieving end-to-end e-business means facing a daunting and expensive challenge: integrating the Web with your existing packaged, custom, legacy and database applications.

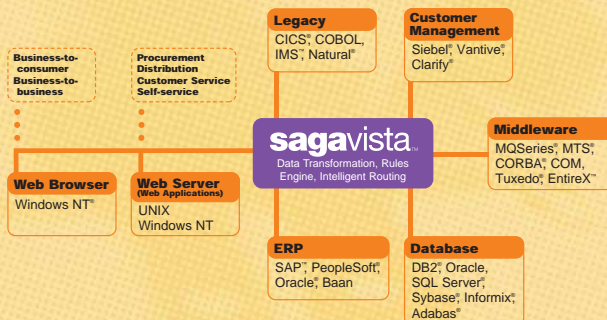

Look no further. SAGA SOFTWARE™ can help.

Whether it's for business-to-consumer, business-to-business, supply chain optimization or customer relationship management, we have the fastest, most flexible solution.

It's called Sagavista™, a revolutionary point-and-click approach to end-to-end e-business integration.

Sagavista helps you overcome the challenges of e-business integration by providing prebuilt application adapters for easily connecting your front-office and back-office systems across the mainframe, UNIX®, Windows® and the Web. These adapters take most of

the time and expense out of integration and allow you to process transactions in real-time, streamline your supply chain, enhance customer satisfaction and improve your bottom line.

End-to-end e-business up to 10 times faster. Sagavista's point-and-click environment takes the programming out of integration.

1. Select the systems you want data to flow between—Web, packaged, custom and legacy
2. Choose the data you want to flow between the systems
3. Apply the data routing rules based on your business processes
4. That's it! Your systems are now integrated for e-business!
